e- In the main house there are common areas, patio, restaurant and upstairs apartment with 3 bedrooms (one of them with 5 beds).

Stables with horses, pigs, cows and chickens.

Communal swimming pool.

Built in 1946.

Water, photovoltaic electricity, internet.

The estate is a unique space, surrounded by nature and with excellent and privileged views. If you have always dreamed of a wedding surrounded by vegetation, light, colours and your loved ones, this place is sure to captivate you.

The estate is thirty-five hectares in size, and has a garden, ideal for outdoor ceremonies and cocktails. It also has an open porch inside, completely glazed, with large, bright windows. Rustic atmosphere, fireplaces to enjoy the winter that is rarely found on our island, or that coolness that old houses offer on sweltering summer days. In this property, you are guaranteed to see the 4 seasons, from the blankets of leaves formed by the falling leaves of the chestnut trees, the patterns of snow, more typical of other latitudes, but which from time to time in winter, allow you to recreate the view with that wonderful white, to the SAKURA, the phenomenon of cherry blossom in spring and the rest of the 3000 fruit trees that cause a burst of colour, through the hot summer days, where a nap under the trees is appreciated.

The decoration is sober, not at all artificial. Very earthy materials have been used, with pieces

of wood and wrought iron, which gives it that 'back to the roots' feel. A look back, enhanced by black and white photographs, old sewing machines, bathtubs like those of yesteryear... However, the most anachronistic thing is not the furniture, but other small details that will not leave urbanites indifferent. Asten Realty reference: 8143.
